

October 8, 2021

To Our Valued Customer,

InSinkErator is excited to announce the expansion of the new Lift & Latch™ installation feature for the remainder of our Power Series and Quiet Series Disposer units. As a reminder, this new feature is exclusive to InSinkErator and makes this our easiest install yet.

Lift and Latch™ makes it easier than ever before to connect an InSinkErator® garbage disposal to the sink. We've eliminated the challenge of having to hold the disposal with one hand, while adjusting the mounting ring with the other hand. Lift and Latch™ technology features a notch in the disposal body that aligns with a tab on the lower mounting ring, holding it in place. Now you can use two hands to lift the disposal and twist it into place. Just Lift and Latch™ for quick and easy installation.

In addition to the installation improvement with the Lift & Latch feature, we have upgraded features on the Badger 5XP model to include stainless steel grind components for longer life and more durability.

To ensure a smooth transition, this will be a rolling change with no Model or UPC change. Part numbers will change and are reflected in the table on the second page. Shipments on the Power and Quiet Series models will commence by November 1, 2021.

Included with this letter is a sell sheet to demonstrate the feature and its benefits more fully.

InSinkErator appreciates your continued support of our products. If you have any questions, please contact your Regional Sales Manager or local manufacturers representative.

Best Regards,

Joe Maiale  
Vice President Sales - Wholesale
