

November 5, 2021

Dear Valued Customer,

Since our previous price increase announcement, we have experienced continued increased costs from our suppliers in the areas of raw materials, freight, packaging, and fuel. As a result of these cost increases, we are announcing price increases on three product categories effective December 6, 2021. The three categories are Gas Connectors, Water Heater Connectors and Water Connectors. Please note that Gas Connectors and Water Heater Connectors did not go up as part of our last increase. Below are the ranges by category. These increases apply to both BrassCraft® and Plumbshop® branded products, where applicable.

<u>Product Category</u>	<u>Approximate Increase</u>
Gas and Water Heater Connectors	3-7%
Water Connectors	6-8%

All orders placed prior to December 6, 2021 will continue to qualify for current pricing. In order to minimize the impact to overall service levels, we will be monitoring and limiting pre-increase orders.

We truly appreciate your business and remain committed to providing the highest quality products in the industry. Our vision of safety, continuous improvement, and in-market sales support remains our commitment to you.

We will be providing you with updated pricing for all products listed above in the coming weeks. Please contact your local sales representative or BrassCraft Sales Manager with any questions or if you would like additional information regarding this price change.

Thank you for your support.

George Werner, Jr.
Vice President, Sales
BrassCraft Manufacturing Company
