

**Many customers have experienced the following:**

**PROBLEM:**

**DRAIN FLIES APPEAR SUDDENLY, & DESPITE EXTERMINATION ATTEMPTS, CONTINUE TO SURVIVE**

- Drain flies build small nests in the fixture outlet pipe
- They multiply rapidly in all drains where there is a food source
- Often they can be found in the drains located around bars in restaurants
- Exterminators treat with foaming chemicals which have proven to only work temporarily, the drain flies re-appear.

**SOLUTION:**

**DF5000 ULTRA-STRENGTH DRAIN FLY ELIMINATOR**

- DF5000 destroys the nests, thus the problem
- The viscosity of DF5000 is a thick liquid; it clings to the side walls of the pipe resisting wash out
- DF5000 digests the organic matter in the drain line, eliminating the breeding ground for drain flies
- Apply in drains where a food source is near by

**APPLICATION**

- Restaurant bar sink drains
- Residential kitchen sink drains and garbage disposals
- Commercial kitchen sink drains, floor drains, and pre rinse sink drains
