

June 1, 2021

To Our Valued Customer,

InSinkErator is excited to announce the launch of Lift & Latch™, a new installation feature for our Power Series and Quiet Series Disposer lines. This new feature is exclusive to InSinkErator and makes this our easiest install yet.

Lift and Latch™ makes it easier than ever before to connect an InSinkErator® garbage disposal to the sink. We've eliminated the challenge of having to hold the disposal with one hand, while adjusting the mounting ring with the other hand. Lift and Latch™ technology features a notch in the disposal body that aligns with a tab on the lower mounting ring, holding it in place. Now you can use two hands to lift the disposal and twist it into place. Just Lift and Latch™ for quick and easy installation. This feature is backward compatible with the InSinkErator QuickLock™ Mounting Assembly.

To ensure a smooth transition, this will be a rolling change with no model name or UPC change. Part numbers will change and are reflected in the table on the second page. Shipments on the Contractor and Pro Series models will commence in July 2021 with other models scheduled in the fall. A separate communication will follow for those models.

Included with this letter is a sell sheet to demonstrate the feature and its benefits more fully.

Additionally, an improvement has been made to the Cover Control Accessory Kit – model number CCPA-00. This part will be converted to include Lift & Latch™ technology. All orders placed after July 1 will be the new accessory making installation easier. This accessory will be backwards compatible to those models that may have not transitioned to Lift & Latch yet.

InSinkErator appreciates your continued support of our products. If you have any questions, please contact your Regional Sales Manager or local manufacturers representative.

Best Regards,

Joe Maiale
